

A Better Catastrophe

Nobody asked but ...

Does your system of knowledge contain the concept of a “better catastrophe?” Well apparently POTUS’s does. He said, while waving the state flag of Texas (for whatever reason), “We want to do it better than ever before.” Do what? And if “we” did “it,” how would we know that we had done it. How much capacity do we, the people, have for buying snake oil from this charlatan?
