

Horton's Law

Nobody asked but ...

Today on the Tom Woods Show (probably not actually today's show, I listen via podcast), Tom cited Horton's Law. If you haven't heard of it before, I bring it to you now as a public service:

(Scott) Horton's Law: Politicians can be counted on to keep all their bad promises, and abandon all their good ones.

No thanks needed. Just listen to Tom Woods and Scott Horton and check out LibertarianInstitute.org.
