

On Anarchy III

It's amazing how many ideas are impossible without anarchy (the absence of coercion). You can't have *peace* without anarchy. You can't have *love* without anarchy. You can't have *liberty* without anarchy. You can't have *security* without anarchy. You can't have *mutual-happiness* or *mutual-prosperity* without anarchy. These are things that most people value and seek after. And they find them. Every second of every day. Every time they're found, that's proof that anarchy *works*. Anarchy isn't political theory or economics, it's you and me and those other people finding peace and love and liberty and security and happiness and prosperity, and more, together. Anarchy is *truly amazing*. And that's today's two cents.
