

On Government Shutdowns

One of the best things that could happen to everyone on Earth is the shutdown of government. Government is the greatest threat to our lives and liberties. It's abolition is the aim of every voluntaryist. Unfortunately, however, what the media is calling a "government shutdown" in the US is really no such thing. 99% of the US Federal Government will continue operating, businesses as usual, ie. inflating our currency, robbing, assaulting, and murdering others. And that's today's two cents.

Skyler.

Update 10/7: Told you so.
