

Does the US Have a Nazi Problem?

The level of the Nazi problem in the US is up to 2.5 (out of 10). 10 years ago it was around a 1.5 ... so it is a very significant rise. The level of Nazi concern, vigilance and fear are at an 8.

The level of the Commie problem in the US is up to 5.5. The level of commie concern, vigilance and fear are at a 2.

Communism has caused vastly more suffering and is vastly more widespread through history and cultures.

Forgive me for ignoring your scaremongering and virtue signaling about the Nazi problem. Your reaction lacks perspective and is disproportionate. We have a culture where it is okay to sport gear and symbols of left wing totalitarians that are responsible for the deaths of vastly more than Nazis ... if you can largely overlook that, your concerns of the incoming Nazi threat seems ridiculous.
