

America's "Days of Rage": The Extensive Left-Wing Bombings & Domestic Terrorism of the 1970s

As the summer of 2020 dawned, left-wing radical groups began rioting and taking over parts of America's cities. While this specific form of left-wing violence is new, left-wing violence itself is far from new in the United States. Indeed, one of the most hidden and concealed parts of recent American history is the extensive left-wing violence that began in the late 1960s and continued into the 1980s.

At first, one might think that these were isolated incidents of small-scale "protest" or even minor violence. However, upon even brief examination, we find out that the outpouring of leftist violence over this time period was anything but minor. The most likely explanation for why you have never heard of this until now is that the events of these years have been consciously buried by those who would prefer you not know about them.

As the left once again ratchets up both its rhetoric and its physical violence, it's time to re-explore this period of American history. What started as a non-violent student movement quickly escalated into a campaign of terrorism against the American people. And while the similarities may not be terribly striking yet, astute readers of this article will quickly see the world in which we live more and more closely resembling the Days of Rage.

The Days of Rage

The Days of Rage were in fact a short and discrete period of time - three days of demonstrations that took place on October 8 through 11, 1969. Throughout this article we will discuss events that took place both before and after the Days of Rage, but consider this period a sort of "coming out" party for the Weathermen, also known as the Weather Underground.

The Weathermen started out as a faction within Students for a Democratic Society. Without getting too much into the weeds, much of what happens during this period of leftist terrorism in the United States has its genesis in a faction fight between the Weathermen, who controlled the national SDS organization, and the rest of their faction (known as the Revolutionary Youth Movement II or RYM II), who were in opposition to the more classically Maoist Worker Student Alliance.

Tensions ran high because the stakes were high - nothing less than total control of the largest student radical organization in America and all of the spoils that came along with that. Many within the Weathermen faction of RYM II believed that they were fighting literal fascism coming to America in the form of President Richard Nixon.

Sound familiar yet? It's about to sound a lot more so.

On October 6, 1969, a statue memorializing a police officer killed during the 1886 Haymarket riots was blown up. No one ever figured out who committed this act of iconoclasm, but the tangible effect of the act of political terrorism was the final isolation of the Weather Underground from the rest of the SDS.

The Weathermen then shifted their activity to the Days of Rage, a protest rally with the slogans "Bring The War Home!" Many wielded lead pipes and were clad in football helmets, ready for a confrontation with the police.

Turnout was disappointing. The Weathermen expected a massive turnout, but only got about 800, who stared down 2,000 Chicago police likely itching for another fight after the 1968 Democratic Convention. By the first night, about 500 had deserted the protest, with about half of the remaining 300 being Weathermen from around the country.

Abbie Hoffman and John Froines, two members of the Chicago Seven, showed up, but declined to speak and left. The remaining hardcore of Weathermen and their supporters shifted the goalposts to simply fighting the police as constituting victory.

At 10:25 p.m., Jeff Jones, one of the leaders of the Weathermen, gave the signal and chaos erupted. The crowd moved through the city, smashing windows of ordinary cars and middle-class homes throughout Chicago, as well as small businesses such as barber shops.

The next day, October 9, a "Women's Militia" comprised of about 70 female Weathermen planned to attack a draft board office, but were prevented from doing so by the Chicago Police Department. The governor called up 2,500 National Guard members to protect Chicago, and protests for later in the day were canceled. The Black Panther Party's local leadership attempted to distance themselves from the Weathermen, describing the group as "anarchistic, opportunistic, adventuristic, and Custeristic."

The next day was the last day of the Days of Rage proper, centered around a march of 2,000 through a Spanish-speaking area of Chicago. The next day, October 11, the Weathermen attempted to reignite the protests, but were quickly sealed off by Chicago's finest. Approximately half of the crowd were arrested in 15 minutes.

It was after the events of the Days of Rage that the Weathermen became the Weather Underground and began moving underground as the name would imply. At a meeting known as the Flint War Council, which was attended by Barack Obama advisor William Ayers, taking place between December 27 and 31, 1969, the Weathermen dissolved their version of SDS, changed their name to the Weather Underground and declared that they would engage in guerilla warfare against the United States government.

Before continuing with the laundry list of terrorist actions carried out by the Weather Underground, it is worth briefly explaining their ideology. The Weather Underground was

not a classically Marxist nor, strictly speaking, a Maoist group. Their cues came more from the American New Left. Thus, much like the radicals creating chaos in American cities in the 2020s, they were far more focused on opposition to the American state, “white privilege” and “white supremacy” than they were in creating bonds across the working class.

In this regard, they differed both from the Maoism of the Progressive Labor Party (made up of former members of the Communist Party, USA, who supported Mao against Krushchev and thus had very real ties to the American labor movement) and the so-called “New Communist Movement” (comprised of younger student activists sympathetic toward Maoism and Third Worldism, but without organic ties to the existing Communist left and the labor movement). They did not, as some other groups in both Maoism proper and the New Communist Movement did, seek either ties with the American working class (which they largely considered “bought off by imperialism”) or the official sanction of Beijing (a long-term goal of both Maoists and New Communists).

There are three important takeaways from all of this inside baseball:

- The Weather Underground considered the American government to be fascist.
- They believed that American military and civil government institutions should be treated in an identical manner to how the Viet Cong would treat the American military.
- The American working class, in particular the *white* American working class, was considered apathetic and useless at best, but generally more considered an active opponent of revolution – thoroughly reactionary and thus, the enemy.

The Weathermen After the Days of Rage

In the first year after the Flint War Council, the Weather Underground engaged in a series of over a dozen bombings or attempted bombings throughout the United States. While supporters of the Weather Underground generally attempt to downplay the significance of the bombings, the group attacked courthouses, the New York Police Headquarters, the Pentagon and the headquarters of the National Guard. Additionally, police found multiple bomb factories designed to aid the guerilla efforts of the group. While 1970 was a highwater year for the group, there were other years of increased activity and the Weather Underground did not disband until 1977.

There were dozens of terrorist attacks carried out in the years between 1970 and 1977. It would be impossible to talk about them all in detail without writing an entire book on the subject. However, some of them are worth pulling out from the pack to discuss individually:

- **New York City Arson Attacks:** The home of New York Supreme Court Justice John M. Murtagh was attacked with Molotov cocktails. Judge Murtagh was the presiding judge of

pretrial hearings for 21 Black Panthers accused of planning a bombing campaign against the city. There were additional attacks against the Columbia University's International Law Library, Army and Navy recruiting booths and a parked police car in the city.

- **Timothy Leary Jailbreak:** Acting as hired mercenaries for The Brotherhood of Eternal Love, a psychedelic drug distribution enterprise, the Weather Underground broke Timothy Leary out of jail for \$20,000.
- **United States Capitol Bombing:** On March 1, 1971, the Weather Underground detonated a bomb at the United States Capitol.
- **Pentagon Bombing:** On March 19, 1972, the Weather Underground blew up the women's bathroom of the Air Force wing of the Pentagon in commemoration of Ho Chi Minh's birthday and in retaliation for the bombing of Hanoi.

In October 1973, the federal government dropped most of the charges against the Weather Underground because new restrictions on electronic surveillance (without a court order handed down from the Supreme Court) meant that the charges likely would not stick. A more complete - and voluminous - list of Weather Underground terrorist attacks can be found [here](#).

Black Liberation Army

The Black Liberation Army was formed in 1970, by members of the Black Panther Party who operated as members of both groups concurrently. Between 1970 and 1976, the group was involved in over 70 acts of violence, including the murders of 13 police officers. Some of their attacks included:

- The bombing of the funeral of police officer Harold Hamilton.
- The hijacking of Delta Air Lines Flight 841.
- The robbery of a Brinks truck in 1981.

May 19th Communist Organization

The May 19th Communist Organization was a reorganized version of the Weather Underground that emerged after the latter began to fall apart. It included members of the Black Liberation Army, the Black Panthers and the Republic of New Afrika, as well as the Weather Underground.

The M19CO was more classically Marxist-Leninist, but no less eager to engage in terrorism. They broke Assata Shakur, convicted of the murder of a state trooper, out of prison and spirited her to Cuba. They were also involved in the robbery of a Brinks truck in 1981, along with the Black Liberation Army, as well as several bombings, including those of the National War College, the United States Senate, the Washington Navy Yard Computer Center, the

South African consulate and the Policemen's Benevolent Association.

Symbionese Liberation Army

Most people know of the Symbionese Liberation Army, if at all, as the group who kidnapped and brainwashed Patty Hearst. Beyond this, they are an excellent example of how a small, but committed, cadre of left-wing activists can wreak havoc far and beyond their numbers, which never exceeded 22.

Their first major action was the assassination of Oakland, CA superintendent of schools Marcus Foster and badly wounding his deputy Robert Blackburn. The pair were attacked with cyanide-packed hollow point rounds as they left a school committee meeting. Foster, the first black superintendent of schools in Oakland, was assassinated because the SLA believed he was going to introduce identity cards in the school system, which they considered "fascist" and which he, in fact, opposed.

Their most famous action was the kidnapping of Hearst publishing heiress Patty Hearst in 1974. She was held by the group for 19 months before she was apprehended by authorities. At first, the SLA demanded the release of Foster's assassins, but when this proved impossible, they demanded the Hearst family distribute \$70 worth of food to every needy person in California. The Hearst family took out a loan to do so, which would have cost \$400 million, but the operation descended into chaos and the SLA refused to free her. The group sometimes restricted Hearst to a dark closet for weeks at a time. She was raped both by leader Donald DeFreeze ("Cinque") and Willie Wolfe ("Kahjoh").

When recovered, Hearst had an IQ of 112, as compared to 130 before her abduction. She chain smoked, had a flattened affect and had trouble remembering significant parts of her pre-SLA life. She weighed 87 pounds when apprehended.

The group committed a number of bank robberies both before and after Hearst's kidnapping.

The Lost History of American Leftist Terrorism

Most Americans have never heard of these acts of terrorism from leftist groups that were so numerous throughout the 1970s. But this is a prime example of "those who don't learn from history are doomed to repeat it." The urban unrest, which has rocked America in the early 2020s, is nothing new. The 1960s saw both race riots and left-wing terrorist groups looking to exploit animosity between racial groups in America.

The question is what are we going to do about it? The answer so far from our elected officials is "not much." If leftist terrorist cells were willing to go this far when they had active opposition from government and corporate figures alike, what are they going to do

when confronted with apathy or encouragement from elected officials and the business sector?

The answer remains to be seen, but will certainly be some variant of “nothing good.”
