

Beyond Schizophrenic

It's funny how often nationalist apologists proclaim how "Western culture" is superior, because it's about property rights, individual liberty, and being rational. But when I point out *violations* of property rights and individual liberty happening in the U.S., and point out irrational authoritarian superstitions, they whine about me "hating the West." So which is it? Cheering for anti-freedom, authoritarian nationalism, in the name of preserving a culture of liberty and reason, is beyond schizophrenic.

Example: "We need thousands of heavily armed government agents making sure everyone has the politicians' holy permission to be here ... in order to protect freedom!"
