

# Education is Liberation

*Editor's Pick. Written by Lisa.*

Education is liberation, inspiration, self-realization and self-actualization.  
School is indoctrination, automation, dictation and regurgitation.

Education is self awareness, not test preparedness.  
Independence, not checking attendance.

Facilitation of creation.  
Not coercion and assertion.

Schools teach rules to make tools. (It is a factory of fools.)  
Life's teachers encourage grit, not ask you to submit.

Respect your right to liberty, not make you ask if you can pee.  
Point out your uniqueness, not your weakness.

Inspection leads to disaffection.  
Affection leads to a sense of connection.

The time has come for an insurrection.
