

# Erratic Behavior

Nobody asked but ...

Isn't it odd when someone known for erratic behavior erratically does something with which an observer agrees, suddenly that erratic behavior becomes the mark of "stable genius?" On the other hand, the action becomes betrayal. Check out Senator Lindsey Graham, for instance.

Well the bad news is that there has never been a POTUS who was not a consistent warmonger. The very nature of the office demands it. There have been 45 warmongers, but some worse than others. The good news is that the office of POTUS is on a path of self-destruction. The path of civilization leads from authoritarianism toward *laissez-faire*. A human being, a social animal of breadth and depth, does not need to relegate choice and responsibility to a fictional leader.
