

Natural Social Ascendancy

Nobody asked but ...

I have to be very careful here because I don't want to be seen as someone pigeon-holed with the eugenics crowd.

But I will assert that there are things going on that are beyond our day-to-day notice. The climate and evolution are two things. My main concern today is evolution.

We are tediously familiar with selection of leaders, artificially, through political procedures. But there is a natural selection process in play that generally operates outside our control.

The human species is evolving. Nature is selecting real leaders. Shall our next leader be Adolph Hitler or Mahatma Gandhi?
