

Rentseeking a la Migrational Purity

Nobody asked but ...

Let me get this straight. We like paying taxes, we just want to control which rathole the money goes down? We don't want illegals to get any of the spillage from our graft and corruption system. We want to improve the efficiency of the graft system by insisting that the government overlords are there to insure whom we get for neighbors. We want to spend billions on failed regimens to control the purity of America rather than to spend half that amount giving money to people we don't like. I don't see where, in the Constitution, or anywhere else that it says the government shall control the composition of the populace. And I certainly don't see where it says that some segments of the mob are due preference in how government shall treat other segments.
