

Rights That Aren't

Written by Wheylous for The Voluntaryist Reader.

Initially, the [American] Founders formulated the Constitution not to delineate the rights of the individual, but to restrict the powers of government. Soon thereafter, it was decided that the Constitution indeed needed to list some individual rights, so greedy was government for power. Hence, the Bill of Rights promised the American public a certain set of rights. Unfortunately, this was a hodge-podge solution that failed to address the fundamental reasons behind those rights - the right to your body and property. Moreover, the misunderstanding of these rights has led to supposedly pro-liberty people taking on some very strange positions. I address a few of these rights here and hope the reader can apply the logic elsewhere.
