

Sometimes Words Don't Bridge Chasms

Nobody asked but ...

Folks, please understand that the Grand Canyon is "open." The federal government may close the Grand Canyon National Park but the National Park Service would have to grow by factors greater than two to keep the people out of the Grand Canyon. Nature opened the Grand Canyon millions of years ago. So don't fall for the lame-stream media's deliberate distortion that Obama Closed the Grand Canyon. And for those peeps who were planning on getting married at the Grand Canyon, is that really as egomaniac as it sounds?
