

The Name Game

Nobody asked but ...

Don't call it Obamacare because that is not its name, and Obama doesn't care. Don't call it insurance because it is not. Don't call it health because it is sickness. Don't claim to understand it because nobody does. No one can possibly have a clue what it is about. Don't talk about its provisions because nobody has read it. Don't try to read it because it is unreadable. Don't call it socialized medicine because we have had government in every facet of health since the early FDR years, and calling it names doesn't stop it.
