

With Cautious Optimism

Bitcoin, 3D printing, independent online learning, charter cities, increasing cultural interconnection, optimistic prospects for seasteading, growing black market entrepreneurship, boom in homeschooling, growing distrust of state-sactioned media, unsustainable state debt. A confluence of positive factors is setting the stage for the development of a voluntary society and for the gradual withering away of the burdensome, dangerous, and embarrassing anachronism of statism. There are reasons to look into the future with cautious optimism.
